

## LET US DO THE DRIVING FOR YOU

Specialised vehicle transport

**It takes special expertise and equipment to safely move cars, motorcycles, boats, farm machinery and other vehicles.**

CEVA has been transporting vehicles all over Australia for more than 50 years. Our team is very experienced and we're passionate about motor vehicles, so we will care for your precious asset just the way you would. And our modern fleet of specialised transporters helps make sure your vehicle is safe and secure, all journey long.

Whether you are a major vehicle manufacturer, dealer or importer, a prestige car owner, a media company or a person or family organising a relocation or holiday, CEVA knows how to make vehicle transport easy for you. You can even track progress 24/7 through our website ([www.cevacarcarrying.com.au](http://www.cevacarcarrying.com.au)).

That's why we are chosen by many of Australia's leading motor vehicle manufacturers, importers and dealerships, like BMW, Mazda and Subaru, as well as major removal companies.

**Choose the service that suits your needs and budget to transport vehicles door to door, depot to depot, door to depot or depot to door:**

- **Standard** – our regular pickup, drop off and transit service
- **Priority** – guaranteed delivery, and pickup and drop off times agreed to suit you
- **Enclosed** – fully covered transporters, for maximum protection and security
- **RAPT** – our special Race and Prestige Transport option, with equipment and service designed to take extra care of your race, prestige, luxury or classic vehicle.

Whichever service option you choose, you can let us do the driving for you and know your vehicle is always in good hands.

Call **13 CARS (13 2277)** to talk to our friendly, expert service team today.

# VEHICLE TRANSPORT CHECKLIST

To make sure your vehicle is transported safely and securely, and to protect your warranty, please use this checklist before your vehicle is dropped off/ picked up and transported.

## Working order

We need to be able to access and move your car during loading, shipment and unloading. If your car is non-driveable, we need to arrange this in advance.

### Please tick:

- ☐ Car engine is working properly
- ☐ Battery is charged and secured (all fittings tightened)
- ☐ Tyres are inflated
- ☐ At least a quarter of a tank of fuel, but not much more
- ☐ All fluids have been topped up
- ☐ I have disabled any non-standard alarm or immobiliser (or I have prepared detailed written instructions telling the driver how to turn off the alarm if it is triggered)
- ☐ I have all keys ready to hand over to the driver

## Securing vehicle and loose items

Your car needs to be prepared so nothing will get broken or stolen during transport.

### Please tick:

- ☐ I have removed all personal belongings
- ☐ I have removed or deactivated all toll tags and/or parking passes or devices
- ☐ I have removed any dangerous goods
- ☐ I have removed or checked and secured all non-original accessories including weather shields, rear window louvers, removable ariels as well as any speciality items like fog lamps, ground effects or spoilers
- ☐ If the car is a convertible, I have secured the top thoroughly (if necessary, I have added a wind-resistant tarp for extra precaution)

## CEVA has a policy of not transporting vehicles with personal or dangerous goods.

**Personal goods** includes vehicle spare parts and those items that are loosely placed within the vehicle and which do not form part of the standard new vehicle when purchased, including: blankets, tools, boxes and cartons, electrical items, liquid containers, cans, compact discs, satellite navigation devices and portable music/video equipment. Please note, baby seats and capsules may be left in vehicles while being transported.

**Dangerous goods** include all forms of ammunition, flares, firearms, and flammable gases and liquids such as BBQ gas bottles, firelighters and aerosols.

If any personal or dangerous goods are identified at the time of drop off or collection, you will be asked to remove these items from your vehicle prior to transportation.

## Moving your car to Western Australia?

Western Australia has strict quarantine regulations to prevent the introduction of exotic pests, diseases and weeds found in other Australian states and territories. If you are transporting a vehicle to Western Australia, you need to make sure it is thoroughly cleaned before it is picked up by CEVA or dropped off at our depot. The vehicle needs to be completely free of mud, plant material and insects, including the windscreen, wiper well, grill and under wheel arches. You may be fined if your vehicle does not pass Western Australia's quarantine inspection. For further details on Western Australia's quarantine regulations see [www.agric.wa.gov.au](http://www.agric.wa.gov.au).

Drop off times at our depots is between 8.30am to 4.00pm Monday to Friday, with the exception of public holidays.
